

WEB OF SCIENCESM

WHAT IS WEB OF SCIENCE?

Search over 12,000 journals and 120,000 conference proceedings across the sciences, social sciences, and arts and humanities to find the high quality research most relevant to your area of interest. Link between relevant research using the cited references and explore the subject connections between articles that are established by the expert researchers working in your field.

GENERAL SEARCH

Search

Combine words and phrases to search across the source records in the *Web of Science*.

Select AND, OR, NOT to change the relationship between search fields.

Add another search field

Select Your Search Field

Use the drop down to select your search field. Search by Topic, Author, Publication Name, Funding Agency, or ResearcherID Number.

- Researcher ID numbers are now searchable from within Web of

Search Operators

Use **AND** to find records containing all terms

Use **OR** to find records containing any of the terms

Use **NOT** to exclude records containing certain words from your search

Use **NEAR/n** to find records containing all terms within a certain number of words (n) of each other (stress NEAR/3 sleep)

Use **SAME** in an Address search to find terms in the same line of the address (Tulane SAME Chem)

Stemming, Stop Words, and Spelling Variants

All words are searched (no Stop Words)

British/English spellings are searched automatically (search behavior to find both behavior and behaviour)

Lemmatization automatically helps find variations by stemming for plurals (even complex plurals like tooth/teeth) and searching different verb tenses (run/running) and degrees of comparison (big finds bigger and biggest). Lemmatization can be turned off by enclosing terms in quotation marks.

Wild Card Characters

Use truncation for more control of the retrieval of plurals and variant spellings with Lemmatization turned off.

***** = zero to many characters

? = one character

\$ = zero or one character

Phrase searching

To search exact phrases in Topic or Title searches, enclose a phrase in quotation marks.

For example, the query **"energy conservation"** finds records containing the exact phrase **energy conservation**.

Parentheses

Use parentheses to group compound Boolean statements. For example:

(river or stream or pond) and ("waste water" or pollution)

Author Name

Enter the last name first, followed by a space and up to five initials.

Use truncation and search alternative spelling to find name variants:

Driscoll C* finds **Driscoll C, Driscoll CM, Driscoll Charles**, and so on.

Driscoll finds all authors with the last name Driscoll

De la Cruz f* OR Delacruz f* finds **Delacruz FM, De La Cruz FM**, and so on.

FULL RECORD

Titles

Full titles are indexed and searchable.

Authors

All authors are indexed. Search using last name and initials (e.g. garfield e*)

Cited Reference

Click on the Cited Reference number to move to the Cited Reference view of this record.

Abstract

All abstracts are indexed as provided by the journal (1991 to present).

Author Keywords and KeyWords Plus

Author Keywords are indexed and searchable. KeyWords Plus are words and phrases harvested from the titles of the cited articles.

Addresses

All author addresses are indexed and searchable. Reprint author e-mail addresses are listed when available. Common address terms will be truncated (Univ, Coll, Hosp, etc.).

Funding Information

Funding agency, grant numbers, and the funding acknowledgement text is searchable (2008 to present).

ResearcherID

ResearcherIDs are searchable and displayed when available. ResearcherIDs are harvested from public profiles at www.researcherid.com.

Link to full text and/or library holdings information.

The screenshot shows a Web of Science record page. At the top, there are navigation tabs: 'All Databases', 'Select a Database', 'Web of Science', and 'Additional Resources'. Below these are search options: 'Search', 'Author Finder', 'Cited Reference Search', 'Advanced Search', and 'Search History'. The main title of the record is 'Monoamine oxidase inactivation: From pathophysiology to therapeutics'. Below the title, the author(s) are listed as 'Bortolato, M (Bortolato, Marco)¹; Chen, K (Chen, Kevin)¹; Shih, JC (Shih, Jean C.)^{1,2}'. The source is 'ADVANCED DRUG DELIVERY REVIEWS Volume: 60 Issue: 13-14 Pages: 1527-1533 DOI: 10.1016/j.addr.2008.06.002 Published: OCT-NOV 2008'. The 'Times Cited' is 24 (from Web of Science). The 'Abstract' is provided in full. Below the abstract, there are sections for 'Author Keywords', 'KeyWords Plus', 'Reprint Address', 'Addresses', 'E-mail Address', and 'Funding'. The 'Funding' section includes a table with columns for 'Funding Agency' and 'Grant Number', listing NIMH grants R01MH67968 and R37MH39085. On the right side of the page, there are sections for 'Times Cited: 26', 'Related Records', 'Cited References: 94', and 'Additional information'.

Times Cited Counts

Times cited counts for the *Web of Science*SM (all editions) and *Web of Knowledge*SM (including *Web of Science*, *Biosis Citation Index*, and *Chinese Science Citation Database*) are displayed on each record. Counts reflect all correct citations and are not limited by your subscription.

CITED REFERENCES

All cited references are indexed and searchable via Cited Reference Search. Click the "References" link on the full record to move to the cited reference view.

Related Records

Click Related Records to find other articles that have cited the same works.

Click the article title to move to a full record.

Unlinked References

Reference that are not linked to full records will display in plain text and include:

Citations to documents not indexed in Web of Science

Citations to Journal Articles outside of your subscription year
Citation variants

Cited References will display current times cited count in the Web of Science and links to full text when available.

SEARCH RESULTS SUMMARY

[View the Full Record](#)

Search Tips:

- Use truncation on cited author and cited work.
- Look for variants (sometimes papers are cited incorrectly) before finishing your search
- The "Citing Articles" count reflects citations from all years and all editions of the Web of Science – even those years and editions you don't subscribe to.
- All cited references are indexed and searchable, including references to books, patents, government documents, etc.
- Secondary cited authors, full source titles, and non-standard source abbreviations are automatically searched across all source records in the *Web of Knowledge*. Keep in mind that a search of this sort may only return partial results.

Nitrous oxide and carbon dioxide fluxes from a bare soil using a micrometeorological approach
Author(s): [Anonymous]
Source: JOURNAL OF ENVIRONMENTAL QUALITY **Volume:** 25 **Issue:** 4 **Pages:** 898-907 **Published:** JUL-AUG 1996
Times Cited: 37 (from Web of Science)
Cited References: 40 [view related records] [Citation Map](#)
Abstract: Increasing atmospheric carbon dioxide (CO2) and nitrous oxide (N2O) levels have prompted research on management of the soil C and N pools. The impact of C and N fertilizer addition on N2O and CO2 field emissions is not clear. We determined N2O and CO2 fluxes from a 1-ha bare soil plot using

PERSONALIZE

Create a *Web of Knowledge* Profile to

- Save searches
- Create Search Alerts
- Create Citation Alerts
- Establish an *Endnote Web* Library
- Create a *ResearcherID* profile

Click "Sign In" to register for a *Web of Knowledge* Profile

Click "Search History" to view your entire search history.

Click "My Citation Alerts" or "My Saved Searches" to manage your searches and alerts*

- Run any saved search
- Renew alerts (24 weeks for Search Alerts, one year for Citation Alerts.)
- Change your alert settings
- Set an RSS Feed

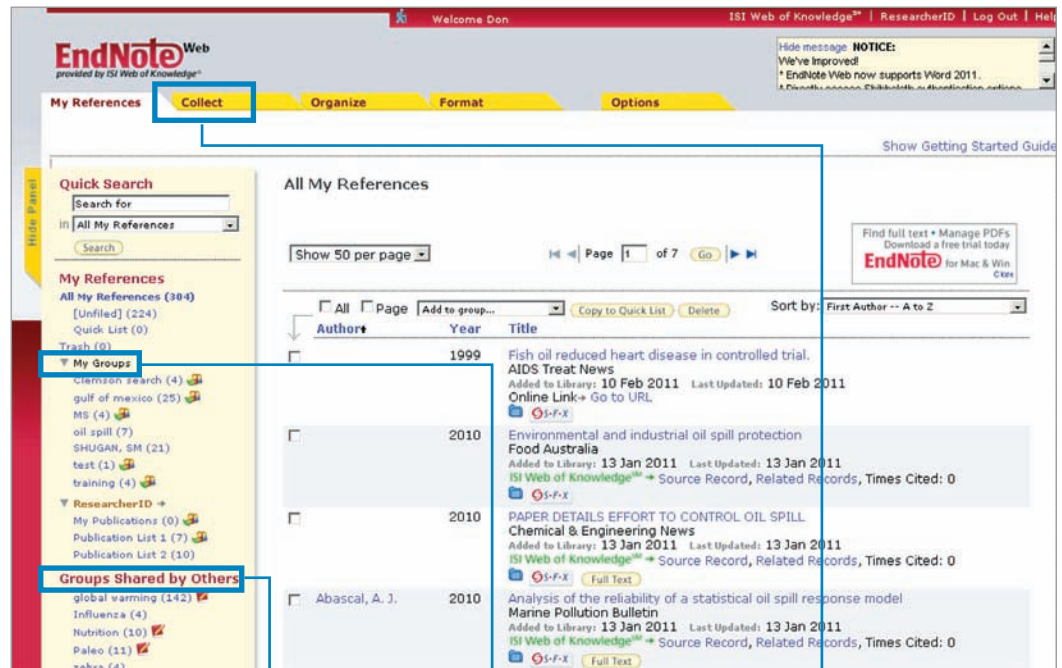

*Search Alerts will be based on the last query in your search history and will remain active for 24 weeks. You will be notified two weeks before an alert expires. Expired alerts will remain in your profile as saved searches until you delete.

MANAGE RESULTS

EndNote Web

Save up to 10,000 references in your personal *EndNote Web* library. With *EndNote Web* you can collect references from online databases and library catalogs from around the world. References imported from the *Web of Knowledge* will remain marked with an *EndNote Web* icon for as long as the record is in your library.

Use *EndNote Web's* powerful Cite While You Write tools to add references and format bibliographies in documents you are writing. Once you have created an *EndNote Web* library you can access it at any time, either from your *Web of Knowledge* profile or by going to www.myendnoteweb.com and entering your *Web of Knowledge* User ID and Password. *EndNote Web* can also be fully integrated with the *EndNote* resource.

Share
Share your reference groups with any *EndNote Web* User

Organize
Use "Groups" to organize your library.

Collect
Go to "Collect" to start searching Library Catalogs from around the world.

ResearcherID

ResearcherID is your free, public online space to establish a unique *ResearcherID* number and create a personal profile. Your *ResearcherID* profile can include information about your institutional affiliations, research interests, and a list of your publications. Publication information from the *Web of Science* will have live citation information (updated weekly) and include direct links back to the source record. Once you have added your publications, to your *ResearcherID* profile, your unique *ResearcherID* number will be automatically associated with your publications in the *Web of Science*, creating a direct link from the *Web of Science* record to your *ResearcherID* profile.
